

App Development Tasks & Instructions — CodeAlpha

App Development — Internship Overview

This internship program provides real-world experience in **mobile and web application development**. CodeAlpha is a leading software development company committed to fostering innovation and excellence in technology. The internship equips students with hands-on experience in building user-friendly, scalable apps using modern frameworks and tools. Interns will gain practical knowledge, receive expert mentorship and work in a collaborative, project-based environment.

Internship Perks

- Internship Offer Letter
 - Completion Certificate (QR Verified)
 - Unique ID Certificate
 - Letter of Recommendation (based on performance)
 - Job Opportunities / Placement Support
 - Resume Building Support
-

Instructions for Interns

1. Share your internship status on **LinkedIn**, tagging **@CodeAlpha**.
 2. Complete the **assigned projects** within the mentioned time frame.
 3. Upload your complete source code to **GitHub** in a repository named:
`CodeAlpha_ProjectName`
 4. Post a **video explanation** of your project on LinkedIn with GitHub repo link.
 5. Submit your completed task using the **Submission Form**.
 6. **Complete any 3 or 2 out of the 4 tasks** listed below (from your domain).
-

App Development Task List

(Complete any 2 or 3 of the following tasks)

TASK 1: Flashcard Quiz App

Create a flashcard quiz app for studying. Users can:

- Each flashcard will have a **question on the front** and **answer on the back**, with a "Show Answer" button.
 - Users can **navigate between cards** using "Next" and "Previous" buttons.
 - Users should be able to **add, edit, and delete flashcards** for customization.
 - The app should have a **simple and clean user interface** for easy usage.
-

✓ TASK 2: Random Quote Generator

Develop an app that:

- The app should **display a random quote** every time the user opens the app or clicks a button.
 - Include a **"New Quote" button** that shows a different quote on each click.
 - Each quote should display **text and author name** clearly.
 - The app must have a **clean and minimal UI** for better user experience.
-

✓ TASK 3: Fitness Tracker App

Create a fitness tracking app:

- The app should allow users to **track daily fitness activities** like steps, workouts, calories burned, etc.
 - Users can **add or log their fitness data manually** (e.g., workout time, exercise type, calories).
 - Include a **dashboard or summary screen** showing daily/weekly progress.
 - UI should be **simple, clean, and user-friendly**, with visual elements like graphs or progress bars.
 - Data can be stored using **local storage (like SQLite)** or integrated with a **backend like Firebase** for saving user records.
-

✓ TASK 4: Language Learning App

Build an interactive language learning app:

- The app should help users **learn new words, phrases, or sentences** in a selected language.
 - Include **daily lessons or flashcards** with translations and pronunciations.
 - Users can **take quizzes or practice tests** to check their learning progress.
 - The app should have a **clean and intuitive UI**, with categories like vocabulary, grammar etc.
 - Learning data can be **stored locally** or synced using a **backend like Firebase**.
-

Important Note

Internship Completion Criteria:

To be eligible for the internship certificate, participants must complete a minimum of **two or three tasks**. Submitting only one task will be considered **incomplete**, and certificates will **not** be issued in such cases.

Submission Details

A submission form will be shared in your respective **WhatsApp group**. You are required to submit your completed task only through that form. Please follow the instructions mentioned in the form carefully to ensure your submission is accepted.
