

C Programming Tasks & Instructions — CodeAlpha

C Programming— Internship Overview

This internship program provides practical exposure to the fundamentals of the **C programming language**, one of the most powerful and widely used programming languages in computer science. CodeAlpha is a leading software development company dedicated to nurturing future programmers by providing real-world learning opportunities.

The internship focuses on mastering **C basics, loops, arrays, pointers, structures, file handling, and memory management**, along with problem-solving skills through projects. Interns will also gain experience in writing efficient and optimized code, which is essential for systems programming and embedded applications.

During this internship, students will work on **real-world projects** such as mini calculators, student record management systems, and bank management applications. With expert mentorship and hands-on assignments, interns will strengthen their logical thinking, improve debugging skills, and develop a strong foundation in programming.

By the end of the internship, participants will be able to confidently build C programs, apply problem-solving strategies, and be ready to explore advanced domains like **Operating Systems, Embedded Systems and Competitive Programming**.

Internship Perks

- Internship Offer Letter
 - Completion Certificate (QR Verified)
 - Unique ID Certificate
 - Letter of Recommendation (based on performance)
 - Job Opportunities / Placement Support
 - Resume Building Support
-

Instructions for Interns

1. Share your internship stat us on **LinkedIn**, tagging **@CodeAlpha**.
 2. Complete the **assigned projects** within the mentioned time frame.
 3. Upload your complete source code to **GitHub** in a repository named:
CodeAlpha_ProjectName
 4. Post a **video explanation** of your project on LinkedIn with GitHub repo link.
 5. Submit your completed task using the **Submission Form**.
 6. **Complete any 3 or 2 out of the 4 tasks** listed below (from your domain).
-

C Programming Task List

(Complete any 2 or 3 of the following tasks)

✓ TASK 1: Basic – Calculator Program

Write a C program to perform **basic arithmetic operations** (Addition, Subtraction, Multiplication & Division). Use **switch case** for operation selection.

✓ TASK 2: Medium – Matrix Operations

Write a program to implement:

- Matrix Addition
- Matrix Multiplication
- Transpose

Use **functions** and **2D arrays** for better modularity.

✓ TASK 3: High – Student Management System

- Create a menu-driven C program to manage student records.
 - Features: Add, Delete, Update, Search, Display records.
 - Use **structures + file handling** to store data permanently.
-

✓ TASK 4: High – Banking System (Mini Project)

Build a **Bank Account Management System** in C.

Functions: Deposit, Withdraw, Balance Enquiry, and Exit.

Implement using **functions, structures, and file handling**.

Important Note

Internship Completion Criteria:

To be eligible for the internship certificate, participants must complete a minimum of **two or three tasks**. Submitting only one task will be considered **incomplete** and certificates will **not** be issued in such cases.

Submission Details

A submission form will be shared in your respective **WhatsApp group**. You are required to submit your completed task only through that form. Please follow the instructions mentioned in the form carefully to ensure your submission is accepted.
